FIRST RECORDED CAPTURE OF GLOSSINA PALLIDIPES  
IN THE MTKO/INYANGA OPERATIONS AREA

A single female tsetse fly captured on the Chimucheka river one and a half miles south of its confluence with the Ruenya river has been positively identified as Glossina pallidipes (Aust). The capture was made on the 22nd of April 1970 using an ox as bait. This is the first recording of this species of tsetse fly from the Mtko/Inyanga operations area.
